PROJECTS

Spottr – A Student PG Finder

I have built Spottr website which is an online student PG finder website I have designed using Adobe XD and developed using React JS and this is responsive for all the devices and deployed in vercel

Project Link - https://spottr-pg-finder.vercel.app/

Meme Generator

I have built a dynamic page application called "Meme Generator" which is a fun app where you can generate a meme by adding text on the image provided by API. It is responsive for all the devices and deployed in vercel

Project Link –https://meme-generator-six-xi.vercel.app/

Book My Show Clone

I have built Book my show clone from scratch using React and Tailwind CSS. It is responsive for all the devices. I used the TMDB movie database for movie details. I build this during my internship at Shape AI
Project Link - https://book-my-show-clone-taupe.vercel.app/

Task Manager

I have built Task Manager from scratch using Bootstrap, JavaScript it is responsive for all the devices. It is a Task manager Application in which users can store their day to day tasks in this application. I build this during my internship at Shape AI

Project Link –
https://vercel.com/shivkumar54/taskify-project-02

Zomato Landing Page

I built a Zomato landing page which is a single page application using HTML and CSS and it is responsive for all devices. I build this during my internship at Shape AI

Project Link –
https://vercel.com/shivkumar54/my-zomato-project-001
